SHARING THOUGHTS & EXPLORE
THEORETICAL ARCHITECTURAL SOLUTIONS

with
UPM

- basic living needs / lifestyle
- community living / lifestyle
- housing as an investment to facilitate affordability
- technology

Ar. Wan Sofiah Wan Ishak is a Professional Architect registered with the Board of Architects Malaysia [LAM] for more than 20 years. She received her education in Exeter, United Kingdom (UK) for A Levels and subsequently at the Nottingham University, UK for the architecture course. During her eight years stay, she had the opportunity to work in the UK for professional training.

In 2000, she set up the Design Evolution Architects Sdn Bhd [DeA] with two friends, where she has been the director until now. Design at DeA is an evolutionary process generated through research, participations in intellectual discourse then evolved into architectural solutions. She finds a balance in keeping the dynamic at DeA by sharing, exploring innovative ideas and theoretical solutions at UPM design studios since 2005. She has been an active member of LAM and PAM, serving their respective council at various levels.

Registered Professional Architect with Board of Architects Malaysia
Registered Interior Designer with Board of Architects Malaysia
Registered GBI Facilitator with GreenBuildingIndex Sdn Bhd
Registered ASEAN Architect with ASEAN Architect Council
