LAr. Asraf Abdul Rahman is a Senior Lecturer at the Department of Landscape Architecture, Faculty of Design and Architecture, Universiti Putra Malaysia. He received the Diploma in Landscape Design from the Institut Teknologi Mara (presently known as Universiti Teknologi MARA) in 1989, Bachelor Degree in Landscape Architecture with Honours from Universiti Teknologi Malaysia (1996) and Master of Environment from Universiti Putra Malaysia (2000).

Asraf joined the Department of Landscape Architecture, as a Lecturer in 2007. Previously, he was engaged as a Landscape Architect at Original Scope Sdn. Bhd. (Design Consultant Firm) and later at KLCCB Projek Bhd. (Project Management Firm) overseeing the Putrajaya development project. He also practiced as a design consultant and advisor for government and private projects.

His areas of specialization are in the field of landscape architecture, landscape construction and green infrastructure and technology. His research interests include natural landscape, environmental, green design infrastructure and

construction technology. He has published articles in design journal and books relating to landscape architectural practices.

Asraf is a Corporate Member of the Institute of Landscape Architects Malaysia (ILAM). He is the Head of the Green Infrastructure and Technology Research Group, Faculty of Design and Architecture, Universiti Putra Malaysia.

Asraf's philosophy is "things around me that are related to construction always trigger my interest, it seems like a soul searching process. Construction method and technology keep on changing and improving, thus, I always keep track on these dimensions in my research and teaching for students to develop deeper understanding and passion on the subject. It will set a new paradigm to the Landscape Architecture profession. Since humankind values the potentiality of the tangible things, construction assists in materializing it without compromising human needs and environmental sensitivity. Without soul and hard work, patience and passion are meaningless."
