Dr. Norhuzailin Hussain received both her Diploma and Bachelor degree in Landscape Architecture from the Universiti Teknologi MARA (formerly known as Institut Teknologi MARA), Shah Alam, MSc. (Built Environment) from the International Islamic University Malaysia and PhD in Landscape Architecture from the University of Sheffield, United Kingdom. In 2001, she joined the Department of Landscape Architecture as a Tutor, in 2006 as a Lecturer and 2016 as a Senior Lecturer. She teaches Applied Graphic and Introduction to Landscape Architecture for undergraduate program.

Norhuzailin has professional working experience as a Landscape Architect and Designer. Her research interests include the use and experience of recreational spaces and forests, and meanings associated with green spaces. She is keen to explore further on the impact of culture, gender and ethnicity on the use of green spaces in urban and rural contexts.

Appointed as the undergraduate Program Co-ordinator of the Landscape Architecture Department, she is responsible for the academic program and

curriculum development. She is a member of the Greenery and Well Being Research Group, the International Sustainable Tropical Environmental Design Exhibition (STEdex' 16/17), the Finance Committee of the faculty, and the working committee team for Green Scale III 2016. She is also a member of the Academic Staff Association of UPM.

She was awarded the Fundamental Research Grant from the Ministry of Higher Education in 2014 for the research entitled "Women's Childhood Experience and Attachment to Recreational Parks in Klang Valley, Malaysia". She also collaborates as a co-researcher in project such as "Determination of Women's Perception of Safety Regarding Vegetation Design in Public Parks, Kuala Lumpur". She has published several research papers and book chapters in local and international publications. She has also reviewed research paper for conferences and supervised postgraduate students.
