Regular articles are full-length original empirical investigations, consisting of introduction, materials and methods, results and discussion, conclusions. Original work must provide references and an explanation on research findings that contain new and significant findings.

Size: Generally, these are expected to be between 6 and 12 journal pages (excluding the abstract, references, tables and/or figures), a maximum of 80 references, and an abstract of 150–200 words.

2. REVIEW ARTICLE

These report critical evaluation of materials about current research that has already been published by organizing, integrating, and evaluating previously published materials. It summarizes the status of knowledge and outline future directions of research within the journal scope. Review articles should aim to provide systemic overviews, evaluations and interpretations of research in each field. Re-analyses as meta-analysis and systemic reviews are encouraged. The manuscript title must start with “Review Article:”

Size: These articles do not have an expected page limit or maximum number of references, should include appropriate figures and/or tables, and an abstract of 100–200 words. Ideally, a review article should be of 7 to 8 printed pages.

3. SHORT COMMUNICATIONS/PROJECT REVIEW AND CRITIQUES

They are timely, peer-reviewed and brief. These are suitable for the publication of significant technical advances and may be used to:

- a. provide systematic design review or critiques on the architectural and design projects which are relevant with journal scope;
- b. report new developments, significant advances and novel aspects of experimental and theoretical methods and techniques which are relevant for scientific investigations within the journal scope;
- c. report/discuss on significant matters of policy and perspective related to the science of the journal, including 'personal' commentary;

The author must furnish the book information or bibliographic citation in full includes author(s), place, publisher, date of publication, edition statement, pages, special features (maps, colour plates, etc.), price and ISBN. **PLEASE NOTE:
NO EXCEPTIONS WILL BE MADE FOR PAGE LENGTH.**

Language Accuracy

Alam Cipta **emphasizes** on the linguistic accuracy of every manuscript published. Articles must be in **English** and they must be competently written and argued in clear and concise grammatical English. Contributors are strongly advised to have the manuscript checked by a colleague with ample experience in writing English manuscripts or a competent English language editor.

Author(s) **should provide a certificate** confirming that their manuscripts have been adequately edited. A proof from a recognized editing service should be submitted together with the cover letter at the time of submitting a manuscript to Alam Cipta. **All editing costs must be borne by the author(s)**. This step, taken by authors before submission, will greatly facilitate reviewing, and thus publication if the content is acceptable.

Linguistically hopeless manuscripts will be rejected straightaway (e.g., when the language is so poor that one cannot be sure of what the authors really mean). This process, taken by authors before submission, will greatly facilitate reviewing, and thus publication if the content is acceptable.

MANUSCRIPT FORMAT

The paper should be submitted in one column format with at least 4cm margins and 1.5 line spacing throughout. Authors are advised to use Times New Roman 12-point font and *MS Word* format.

1. *Manuscript Structure*

Manuscripts in general should be organized in the following order:

Page 1: Running title

This page should **only** contain the running title of your paper. The running title is an abbreviated title used as the running head on every page of the manuscript. The running title should not exceed 60 characters, counting letters and spaces.

Page 2: Author(s) and Corresponding author information.

This page should contain the full title of your paper (not exceeding 25 words), followed by the name(s) of all authors, their institutional affiliations (including country/region), and the corresponding author's name, institution, and address. First and corresponding authors must be clearly indicated, with the corresponding author identified by placing an asterisk (*) immediately after the author's name. Authors of all scholarly works must be accurately identified, and persistent digital identifiers (such as ResearcherID or ORCID) or links to institutional profiles may be provided to specify the identity and affiliation of authors.

The names of the authors may be abbreviated following the international naming convention. e.g. Salleh, A.B.¹, Tan, S.G.^{2*}, and Sapuan, S.M.³.

Authors' addresses. Multiple authors with different addresses must indicate their respective addresses separately by superscript numbers:

George Swan¹ and Nayan Kanwal²

¹Department of Biology, Faculty of Science, Duke University, Durham, North Carolina, USA.,
²Office of the Deputy Vice Chancellor (R&I), Universiti Putra Malaysia, Serdang, Malaysia.

A list of number of **black and white / colour figures and tables** should also be indicated on this page. Figures submitted in color will be printed in colour. See "5. *Figures & Photographs*" for details

Page 3: Abstract

This page should repeat the full title of your paper followed by the Abstract. The Abstract must not exceed 250 words for a Regular Paper and 100 words for a Short Communication, and should clearly state the purpose, method, results, and conclusion where applicable.

Keywords: Not more than eight keywords in alphabetical order must be provided to describe the contents of the manuscript.

Page 4: Introduction

This page should begin with the **Introduction** of your article and followed by the rest of your paper.

2. *Text*

Regular Papers should be structured with the headings: Introduction, Literature, Materials and Methods, Results and Discussion, Conclusions, Acknowledgements, References, and Supplementary Data (if available) in this order. Papers may be empirical or conceptual in nature; authors are encouraged to adapt the structure and headings where appropriate to best present their work.

3. *Equations and Formulae*

These must be set up clearly and should be typed double spaced. Numbers identifying equations should be in square brackets and placed on the right margin of the text.

4. *Tables*

All tables should be prepared in a simple table format in accordance with APA 7 guidelines and numbered consecutively using Roman numerals. Explanatory material should be provided in the table legends and footnotes. Each table must be prepared on a new page and embedded within the manuscript. All tables must be cited in the text and accompanied by appropriate captions.

When a manuscript is submitted for publication, tables must also be submitted separately as data - .doc,

.rtf, Excel or PowerPoint files- because tables submitted as image data cannot be edited for publication and are usually in low-resolution.

5. *Figures & Photographs*

Submit **original** figures or photographs, ensuring line drawings are clear with high black-and-white contrast. Each figure or photograph should be prepared on a new page, embedded in the manuscript for reviewing purposes to keep the file size under 5 MB, and numbered consecutively using Roman numerals. All figures must be cited in the text and accompanied by appropriate captions.

Figures or photographs must also be submitted separately as TIFF, JPEG, or Excel files- because figures or photographs submitted in low-resolution embedded in the manuscript cannot be accepted for publication. For electronic figures, create your figures using applications that are capable of preparing high resolution TIFF files. In general, we require **300 dpi** or higher resolution for **colored and half-tone artwork**, and **1200 dpi or higher** for **line drawings** are required. Failure to comply with these specifications will require new figures and delay in publication.

NOTE: Illustrations may be produced in colour at no extra cost at the discretion of the Publisher; the author could be charged Malaysian Ringgit 50 for each colour page.

6. *References*

References begin on their own page and are listed in alphabetical order by the first author's last name. Only references cited within the text should be included. All references should be in 12-point font and double-spaced.

NOTE: When formatting your references, please follow the **APA reference style** (7th Edition). Ensure that the references are strictly in the journal's prescribed style, failing which your article will **not be accepted for peer-review**. You may refer to the *Publication Manual of the American Psychological Association* for further details (<http://www.apastyle.org/>).

7. *General Guidelines*

Abbreviations: Define alphabetically, other than abbreviations that can be used without definition. Words or phrases that are abbreviated in the introduction and following text should be written out in full the first time that they appear in the text, with each abbreviated form in parenthesis. Include the common name or scientific name, or both, of animal and plant materials.

Acknowledgements: Individuals and entities that have provided essential support such as research grants and fellowships and other sources of funding should be acknowledged. Contributions that do not involve researching (clerical assistance or personal acknowledgements) should **not** appear in acknowledgements.

Authors' Affiliation: The primary affiliation for each author should be the institution where most of their work was done. If an author has subsequently moved to another institution, the current address may also be stated in the footer.

Co-Authors: The commonly accepted guideline for authorship is that one must have substantially contributed to the development of the paper and share accountability for the results. Researchers should decide who will be an author and what order they will be listed depending upon their order of importance to the study. Other contributions should be cited in the manuscript's Acknowledgements.

Copyright Permissions: Authors should seek necessary permissions for quotations, artwork, boxes or tables taken from other publications or from other freely available sources on the Internet before submission to Alam Cipta. Acknowledgement must be given to the original source in the illustration legend, in a table footnote, or at the end of the quotation.

Footnotes: Current addresses of authors if different from heading may be inserted here.

Page Numbering: Every page of the manuscript, including the title page, references, tables, etc. should be numbered.

Spelling: The journal uses American or British spelling and authors may follow the latest edition of the Oxford Advanced Learner's Dictionary for British spellings.

Ethics and Publication Integrity

Alam Cipta adheres to the principles and best practices outlined by the Committee on Publication Ethics (COPE). Authors are responsible for ensuring that their manuscripts uphold the highest standards of research and publication ethics. Submissions must be original, not previously published, and not under consideration elsewhere. Proper acknowledgment of all sources is required, and plagiarism in any form is unacceptable.

Authors must disclose any potential conflicts of interest and ensure that all co-authors have approved the final version of the manuscript. For studies involving human participants, animals, or sensitive data, authors must confirm that all relevant ethical approvals have been obtained and that the research complies with international ethical standards. The journal reserves the right to reject or retract manuscripts found to violate ethical principles.
